When Parents Have Problems Jun 27 2022 Numerous books have been written for adults who grew up coping with troubled and difficult parents. Often the adults who read these books say, I wish someone had told me that when I was a kid; it might have helped me so much. Unfortunately, not much has been written for the kids who are coping in the present with difficult or troubled parents. This book is written out of the belief that intelligent kids can use sound ideas to improve their lives, either on their own or with the help of healthy adults. It will offer help in sorting out whether a difficult situation may be a result of a parent ' s problems. In this new third edition, changes have been made throughout in order to update and refine the author ' s ideas. Two new chapters have been added, as well. The first new chapter addresses parents who tell lies. Dishonest parents are motivated in several different ways, but all dishonest parents pose special problems for their children. The second chapter discusses the idea that all parents have problems some of the time. In this chapter, the author helps young people look at the challenges posed by recognizing that all parents, even excellent ones, have shortcomings, and it differentiates between the ordinary shortcomings that all parents have and more serious problems in parenting. This book is an excellent resource for therapists, school counselors, group leaders, and others who work with children and teenagers and who want reading materials to recommend to them.

Achieving Permanence for Older Children and Youth in Foster Care Jan 23 2022 Through a novel integration of child welfare data, policy analysis, and evidence-informed youth permanency practice, the essays in this volume show how to achieve and sustain family permanence for older children and youth in foster care. Researchers examine what is known about permanency outcomes for youth in foster care, how the existing knowledge base can be applied to improve these outcomes, and the directions that future research should take to strengthen youth permanence practice and policy. Part 1 examines child welfare data concerning reunification, adoption, and relative custody and guardianship and the implications for practice and policy. Part 2 addresses law, regulation, court reform, and resource allocation as vital components in achieving and sustaining family permanence. Contributors examine the impact of policy change created by court reform and propose new federal and state policy directions. Part 3 outlines a range of practices designed to achieve family permanence for youth in foster care: preserving families through community-based services, reunification, adoption, and custody and guardianship arrangements with relatives. As growing numbers of youth continue to "age out" of foster care without permanent families, researchers, practitioners, and policymakers have increasingly focused on developing evidence-informed policies, practices, services and supports to improve outcomes for youth. Edited by leading professionals in the field, this text recommends the most relevant and effective methods for improving family permanency outcomes for older youth in foster care.

How People Learn Nov 28 2019 First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Transforming the Workforce for Children Birth Through Age 8 Sep 06 2020 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
