The Patron-Driven Library Jun 27 2019 Libraries in the USA and globally are undergoing quiet revolution. Libraries are moving away from a philosophy that is collection-centered to one focused on service. Technology is key to that change. The Patron Driven Library explores the way technology has moved the focus from library collections to services, placing the reader at the center of library activities. The book reveals the way library users are changing, and how social networking, web delivery of information, and the uncertain landscape of e-print has energized librarians to adopt technology to meet a different model of the library while preserving core values. Following an introduction, the first part begins with the historical milieu, and moves on to current challenges for financing and acquiring materials, and an exploration of why the millennial generation is transformational. The second part examines how changes in library practice can create a culture for imagining library services in an age of information overflow. The final chapter asks: Whither the library? Provides a synthesis of current research on the impact of technology on behaviour, and connecting it with library services Offers examples and practical advice for incorporating technology to meet user expectations and assess services Suggests management techniques to overcome barriers to change and technology innovation Evolving Software Systems Jan 15 2021 During the last few years, software evolution research has explored new domains such as the study of socio-technical aspects and collaboration between different individuals contributing to a software system, the use of search-based techniques and meta-heuristics, the mining of unstructured software repositories, the evolution of software requirements, and the dynamic adaptation of software systems at runtime. Also more and more attention is being paid to the evolution of collections of inter-related and inter-dependent software projects, be it in the form of web systems, software product families, software ecosystems or systems of systems. With this book, the editors present insightful contributions on these and other domains currently being intensively explored, written by renowned researchers in the respective fields of software evolution. Each chapter presents the state of the art in a particular topic, as well as the current research, available tool support and remaining challenges. The book is complemented by a glossary of important terms used in the community, a reference list of nearly 1,000 papers and books and tips on additional resources that may be useful to the reader (reference books, journals, standards and major scientific events in the domain of software evolution and datasets). This book is intended for all those interested in software engineering, and more particularly, software maintenance and evolution. Researchers and software practitioners alike will find in the contributed chapters an overview of the most recent findings, covering a broad spectrum of software evolution topics. In addition, it can also serve as the basis of graduate or postgraduate courses on e.g., software evolution, requirements engineering, model-driven software development or social informatics.

Semantic Hyper/Multimedia Adaptation Mar 29 2022 Nowadays, more and more users are witnessing the impact of Hypermedia/Multimedia as well as the penetration of social applications in their life. Parallel to the evolution of the Internet and Web, several Hypermedia/Multimedia schemes and technologies bring semantic-based intelligent, personalized and adaptive services to the end users. More and more techniques are applied in media systems in order to be user/group-centric, adapting to different content and context features of a single or a community user. In respect to all the above, researchers need to explore and study the plethora of challenges that emergent personalisation and adaptation technologies bring to the new era. This edited volume aims to increase the awareness of researchers in this area. All contributions provide an in-depth investigation on research and deployment issues, regarding already introduced schemes and applications in Semantic Hyper/Multimedia and Social Media Adaptation. Moreover, the authors provide survey-based articles, so as potential readers can use it for catching up the recent trends and applications in respect to the relevant literature. Finally, the authors discuss and present their approach in the respective field or problem addressed.

An Answer to the common objections to Chinese testimony; and an earnest appeal to the Legislature of California for their protection by our law Sep 10 2020

An Answer to the Lord Digbies Speech in the House of Commons Jun 19 2021

Experimental IR Meets Multilinguality, Multimodality, and Interaction Sep 03 2022 This book constitutes the refereed proceedings of the 11th International Conference of the CLEF Association, CLEF 2020, held in Thessaloniki, Greece, in September 2020.* The conference has a clear focus on experimental information retrieval with special attention to the challenges of multimodality, multilinguality, and interactive search ranging from unstructured to semi-structured and structured data. The 5 full papers and 2 short papers presented in this volume were carefully reviewed and selected from 9 submissions. This year, the contributions addressed the following challenges: a large-scale evaluation of translation effects in academic search, advancement of assessor-driven aggregation methods for efficient relevance assessments, and development of a new test dataset. In addition to this, the volume presents 7 "best of the labs" papers which were reviewed as full paper submissions with the same review criteria. The 12 lab overview papers were accepted out of 15 submissions and represent scientific challenges based on new data sets and real world problems in multimodal and multilingual information access. * The conference was held virtually due to the COVID-19 pandemic.

Expert Internet Searching Jan 03 2020 In an environment where increasing amounts of information (and fake news) flood the internet on websites and social media, the information professional's job is getting harder. It is important that they are skilled at finding and using the appropriate information and assisting users in working out what information they need and the best way of getting it. Expert Internet Searching provides library and information professionals with in-depth practical information on how to search the internet quickly and effectively to help their users and make their lives easier. Now fully revised for its fifth edition, this book covers the basics of search before going into detail on how to run advanced and complex searches using a variety of different search engines. This edition has been updated to include current trends in search, such as social media search, fake news, and discussion of the authority and validity of search results. It will ensure that information professionals, whether complete beginners or more experienced, are able to work efficiently to obtain accurate information in a timely fashion. Key topics covered include: an introduction to the internet and search engines the Google experience and a discussion of its disadvantages directory, clustering and similarity search engines visual and image search engines specialized search engines incorporating academic search and services for children academic and other specialized search engines news-based search engines including traditional media resources and a discussion of fake news social media search engines hints and tips on better searching. This book will be useful reading for any information professional who is seeking to gain an in-depth understanding of the search process and the search industry. It provides a vital guide to the basics in search, but will also help experienced professionals stay up to date with the

latest trends and information in the industry.

The Handy California Answer Book Jul 21 2021 California is the country's most populous state. The home of the entertainment industry and silicon valley. It's known for its beaches, its redwood forests, and as the "land of fruit and nuts." Its people, industries, politicians, climate, and allure captivates the world and draws millions of visitors each year. Exploring the state's fascinating history, people, myths, culture, and trivia, The Handy California Answer Book takes an in-depth look at this fascinating, quirky, and diverse state. Learn about the original Indigenous peoples, the Spanish explorers, the independence from Spain, the secession from Mexico, the Gold Rush, the building of the Los Angeles Aqueducts, the earthquakes, the water shortages, and much, much more. Tour landmarks, learn about famous sons and daughters, the sports teams, and the unique character of the state through a combination of facts, stats, and history, as well as the unusual and quirky. This comprehensive guide to California answers more than 1,100 intriguing questions, including How did "Eureka" become the state motto? Why is a grizzly bear on the state flag when no grizzlies exist in California? Was the coast of California ever attacked by pirates? How did Silicon Valley become a center for the high tech industry?

Introduction to Paralegalism: Perspectives, Problems and Skills Apr 17 2021 Master the hands-on skills you'll need to succeed in a modern law office with INTRODUCTION TO PARALEGALISM. 8e. Ten critical skills are covered in the book: identifying legal issues, breaking rules into elements, applying rules to facts interviewing clients, investigating facts, digesting discovery documents, providing litigation assistance, researching the law, drafting documents, and representing clients at administrative agencies where authorized by law. Packed with real-life insights and real-world examples, the text helps you understand the ethical guidelines that lawyers and paralegals must follow and covers the efforts underway to regulate the profession in legislatures, courts, bar associations, and paralegal associations. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Runaway Sep 30 2019 Beaten by her mother and whipped by her stepfather, Emily eventually finds her way into the care system at the age of twelve, and has an abortion after being gang-raped at thirteen. Continuously abused in a sequence of homes, she runs away at sixteen, becomes a prostitute in Soho, and convinces herself she is being punished for killing her baby. But it was never meant to be like that. Adopted at birth in 1956 by a middle-class family, Emily shared a golden childhood with her adopted sister Amy, attending private schools, and enjoying singing and dancing lessons. Things soon changed when Emily's jealous mother came to regard her as a rival. A bored and restless woman, she beat Emily for the first time when she was seven years old and from then on seemed to become addicted to inflicting pain on her daughter. Despite Emily's father's attempts to protect her, the parental rows grew more malicious, until the mother moved out and remarried a narcissistic widower with alcohol problems and a vicious, bullying temper. The abuse intensified until Emily was placed into voluntary care. And so began a toxic spiral of remand homes, psychiatric hospitals, and sleeping rough. It wasn't long before Emily became a teenage 'working girl', where she was paid to engage in bizarre sadomasochistic acts for perverted clients, including a senior judge and a policeman. It was only when she was almost murdered that she turned her life around. Set principally between 1966 and 1972, Runaway captures the sleazy Soho of the period, and the frightening conditions in which many children were kept in care.

Parliamentary Debates (Hansard). Nov 12 2020

Artificial Intelligence for .NET: Speech, Language, and Search Dec 26 2021 Get introduced to the world of artificial intelligence with this accessible and practical guide. Build applications that make intelligent use of language and user interaction to better compete in today's marketplace. Discover how your application can deeply understand and interpret content on the web or a user's machine, intelligently react to direct user interaction through speech or text, or make smart recommendations on products or services that are tailored to each individual user. With Microsoft Cognitive Services, you can do all this and more utilizing a set of easy-to-use APIs that can be consumed on the desktop, web, or mobile devices. Developers normally think of AI implementation as a tough task involving writing complex algorithms. This book aims to remove the anxiety by creating a cognitive application with a few lines of code. There is a wide range of Cognitive Services APIs available. This book focuses on some of the most useful and powerful ways that your application can make intelligent use of language. Artificial Intelligence for .NET: Speech, Language, and Search will show you how you can start building amazing capabilities into your applications today. What You'll Learn Understand the underpinnings of artificial intelligence through practical examples and scenarios Get started building an AI-based application in Visual Studio Build a text-based conversational interface for direct user interaction Use the Cognitive Services Speech API to recognize and interpret speech Look at different models of language, including natural language processing, and how to apply them in your Visual Studio application Reuse Bing search capabilities to better understand a user's intention Work with recommendation engines and integrate them into your apps Who This Book Is For Developers working on a range of platforms, from .NET and Windows to mobile devices. Examples are given in C#. No prior experience with AI techniques or theory is required.

Finding the Answers to Legal Questions, Second Edition Oct 04 2022 Whether for self-representation, to be an informed consumer of legal services, or to learn the U.S. legal system, more people than ever are using the library to obtain legal information and legal research advice. The new edition of Finding the Answers to Legal Questions is a comprehensive guide to help librarians confidently assist users in finding the legal information they need. Newly revised and updated, this timely, clearly organized, and easy-to-use resource is packed with guidance to help librarians answer questions that span the gamut of the law. An ideal book for practicing librarians looking to better serve users' legal needs, as well as for students preparing for careers as librarians, it provides an overview of fundamental legal information, including the basic structure of the U.S. legal system and primary law; how-to instructions for finding primary law in print sources, free websites, and pay-for-view databases; information on how to evaluate the trustworthiness of online and print resources; tips for conducting a legal reference interview; guidance for handling common legal questions, such as lawsuits, family law, landlord-tenant disputes, wills and estate planning, debt, bankruptcy, employment, and criminal law; and advice on how to build a basic legal reference collection. This book will help librarians connect users to the most accurate, up-to-date legal information.

The Inevitable Aug 02 2022 A New York Times Bestseller From one of our leading technology thinkers and writers, a guide through the twelve technological imperatives that will shape the next thirty years and transform our lives Much of what will happen in the next thirty years is inevitable, driven by technological trends that are already in motion. In this fascinating, provocative new book, Kevin Kelly provides an optimistic road map for the future, showing how the coming changes in our lives—from virtual reality in the home to an

on-demand economy to artificial intelligence embedded in everything we manufacture can be understood as the result of a few long-term, accelerating forces. Kelly both describes these deep trends—interacting, cognifying, flowing, screening, accessing, sharing, filtering, remixing, tracking, and questioning—and demonstrates how they overlap and are codependent on one another. These larger forces will completely revolutionize the way we buy, work, learn, and communicate with each other. By understanding and embracing them, says Kelly, it will be easier for us to remain on top of the coming wave of changes and to arrange our day-to-day relationships with technology in ways that bring forth maximum benefits. Kelly's bright, hopeful book will be indispensable to anyone who seeks guidance on where their business, industry, or life is heading—what to invent, where to work, in what to invest, how to better reach customers, and what to begin to put into place as this new world emerges.

Question Answering over Text and Knowledge Base Jul 01 2022 This book provides a coherent and complete overview of various Question Answering (QA) systems. It covers three main categories based on the source of the data that can be unstructured text (TextQA), structured knowledge graphs (KBQA), and the combination of both. Developing a QA system usually requires using a combination of various important techniques, including natural language processing, information retrieval and extraction, knowledge graph processing, and machine learning. After a general introduction and an overview of the book in Chapter 1, the history of QA systems and the architecture of different QA approaches are explained in Chapter 2. It starts with early close domain QA systems and reviews different generations of QA up to state-of-the-art hybrid models. Next, Chapter 3 is devoted to explaining the datasets and the metrics used for evaluating TextQA and KBQA. Chapter 4 introduces the neural and deep learning models used in QA systems. This chapter includes the required knowledge of deep learning and neural text representation models for comprehending the QA models over text and QA models over knowledge base explained in Chapters 5 and 6, respectively. In some of the KBQA models the textual data is also used as another source besides the knowledge base; these hybrid models are studied in Chapter 7. In Chapter 8, a detailed explanation of some well-known real applications of the QA systems is provided. Eventually, open issues and future work on QA are discussed in Chapter 9. This book delivers a comprehensive overview on QA over text, QA over knowledge base, and hybrid QA systems which can be used by researchers starting in this field. It will help its readers to follow the state-of-the-art research in the area by providing essential and basic knowledge.

Information Retrieval Technology Nov 24 2021 This book constitutes the refereed proceedings of the 9th Information Retrieval Societies Conference, AIRS 2013, held in Singapore, in December 2013. The 27 full papers and 18 poster presentations included in this volume were carefully reviewed and selected from 109 submissions. They are organized in the following topical sections: IR theory, modeling and query processing; clustering, classification and detection; natural language processing for IR; social networks, user-centered studies and personalization and applications.

Social Informatics Aug 29 2019 This book constitutes the proceedings of the 5th International Conference on Social Informatics, SocInfo 2013, held in Kyoto, Japan, in November 2013. The 23 full papers, 15 short papers and three poster papers included in this volume were carefully reviewed and selected from 103 submissions. The papers present original research work on studying the interplay between socially-centric platforms and social phenomena.

Open Problems in Topology II Apr 29 2022 This volume is a collection of surveys of research problems in topology and its applications. The topics covered include general topology, set-theoretic topology, continuum theory, topological algebra, dynamical systems, computational topology and functional analysis. * New surveys of research problems in topology * New perspectives on classic problems * Representative surveys of research groups from all around the world

Answer to Objections to Chinese Testimony, and Appeal for Their Protection by Our Laws Oct 12 2020

Collected Novels Volume Four Feb 02 2020 This volume of Paul Auster's collected novels includes *Travels in the Scriptorium*, *Man in the Dark*, *Invisible* and *Sunset Park*.
The Music Substitute Sourcebook, Grades 4-8 Apr 05 2020 The Music Substitute Sourcebook is an engaging, ready-to-use resource for music teachers or music substitutes. These quality, standards-based lesson plans and student activities have been developed to allow anyone to easily step into the role of "Music Teacher" and maintain the educational momentum of the class. The fully reproducible lesson plans in The Music Substitute Sourcebook have been thoroughly field tested by substitutes with no musical training, and they have enthusiastically endorsed the easy-to-follow format and creative, fun-to-teach activities. With The Music Substitute Sourcebook, students will be actively engaged in the lessons and furthering their musical growth as they discover and explore a wide variety of musical concepts.

Reports of Cases Decided in the Supreme Courts of Scotland and in the House of Lords on Appeal from Scotland Feb 25 2022

Information Literacy in Everyday Life Mar 05 2020 This book constitutes the refereed post-conference proceedings of the 6th European Conference on Information Literacy, ECIL 2018, held in Oulu, Finland, in September 2018. The 58 revised papers included in this volume were carefully reviewed and selected from 241 submissions. The papers cover a wide range of topics in the field of information literacy and focus on information literacy in everyday life. They are organized in the following topical sections: information literacy in different contexts of everyday life; information literacy, active citizenship and community engagement; information literacy, health and well-being; workplace information literacy and employability; information literacy research and information literacy in theoretical context; information seeking and information behavior; information literacy for different groups in different cultures and countries; information literacy for different groups in different cultures and countries; information literacy instruction; information literacy and aspects of education; data literacy and research data management; copyright literacy; information literacy and lifelong learning.

Transesophageal Echocardiography for Pediatric and Congenital Heart Disease Mar 17 2021 This extensively revised textbook reviews the use of transesophageal echocardiography (TEE) in pediatric and young adult patients with cardiac disease. It reviews how TEE has made a vital contribution to these patients—successful and continually improving clinical outcomes, enabling them to live well into adulthood. The book details the evolving technology and applications of TEE (including three-dimensional TEE), describing how this imaging approach remains at the forefront of clinical practice for pediatric patients and those with congenital heart disease (CHD). *Transesophageal Echocardiography for Pediatric and Congenital Heart Disease* represents a unique contribution as the only contemporary text to focus exclusively on the clinical application of TEE in children and all patients with CHD. Written by numerous prominent specialists in the field, it presents a comprehensive, modern and integrated review of the subject. Specific chapter topics include the physics and instrumentation of TEE, structural and functional evaluation, and specialized aspects of the examination, with emphasis on the technical considerations pertinent to both pediatric and adult patients with a variety of congenital and acquired cardiovascular pathologies. Consequently, it serves as a comprehensive reference for the TEE evaluation of CHD, utilizing the segmental approach to diagnosis and discussing the TEE evaluation of the many anomalies encompassing the CHD spectrum. In addition, numerous other relevant topics are discussed, including application of TEE for perioperative and interventional settings. The book is richly illustrated, with many chapters supplemented by illustrative case studies and accompanying videos. A specific section with multiple-choice questions and answers is provided at the end of each chapter to reinforce key concepts. This textbook therefore provides an invaluable and indispensable resource for all trainees and practitioners using TEE in the management of CHD and pediatric patients.

Access 2013 For Dummies Dec 14 2020 The easy guide to Microsoft Access returns with updates on the latest version! Microsoft Access allows you to store, organize, view, analyze, and share data; the new Access 2013 release enables you to build even more powerful, custom database solutions that integrate with the web and enterprise data sources. *Access 2013 For Dummies* covers all the new features of the latest version of Access and serves as an ideal reference, combining the latest Access features with the basics of building usable databases. You'll learn how to create an app from the Welcome screen, get support for your desktop databases, and much more. Includes coverage of all the new features of Access 2013, including the updated interface Shows you how to create and share reports Features special videos and materials created by the authors to help reinforce the lessons included in the book Helps you build data analysis and interface tools for your specific needs Offers plenty of techniques and tips for solving common problems *Access 2013 For Dummies* provides you with access to the latest version of this database tool.

Advances in Ubiquitous Networking Sep 22 2021 This volume publishes new trends and findings in hot topics related to ubiquitous computing/networking. It is the outcome of UNet - an international scientific event that took place on September 08-10, 2015, in the fascinating city of Casablanca, Morocco. UNet15 is technically sponsored by IEEE Morocco Section and IEEE COMSOC Morocco Chapter.
