**Trillions** Jan 15 2021 We are facing a future of unbounded complexity. Whether that complexity is harnessed to build a world that is safe, pleasant, humane and profitable, or whether it causes us to careen off a cliff into an abyss of mind-numbing junk is an open question. The challenges and opportunities--technical, business, and human--that this technological sea change will bring are without precedent. Entire industries will be born and others will be laid to ruin as our society navigates this journey. There are already many more computing devices in the world than there are people. In a few more years, their number will climb into the trillions. We put microprocessors into nearly every significant thing that we manufacture, and the cost of routine computing and storage is rapidly becoming negligible. We have literally permeated our world with computation. But more significant than mere numbers is the fact we are quickly figuring out how to make those processors communicate with each other, and with us. We are about to be faced, not with a trillion isolated devices, but with a trillion-node network: a network whose scale and complexity will dwarf that of today's Internet. And, unlike the Internet, this will be a network not of computation that we use, but of computation that we live in. Written by the leaders of one of America's leading pervasive computing design firms, this book gives a no-holds-barred insiders' account of both the promise and the risks of the age of Trillions. It is also a cautionary tale of the head-in-the-sand attitude with which many of today's thought-leaders are at present approaching these issues. Trillions is a field guide to the future--designed to help businesses and their customers prepare to prosper, in the information.

**Death by Leisure** Mar 05 2020 A British journalist's "fast and funny" account of hedonism and conspicuous consumption in Los Angeles—and his attempt to get in on the fun (*The New York Times*). From the author of *War Reporting for Cowards*, *Death by Leisure* is the incisive, irreverent, and savagely funny story of British journalist Chris Ayres's attempt to infiltrate the American leisure class (and find true love) in the credit-fueled years before the 2008 economic collapse. When the bubble bursts, however, Ayres must learn to live without the billionaire balls, supermodel girlfriends, foie gras pina colodas, and caviar facials to which he's grown accustomed. Just like the rest of us, alas. "With dry British wit, [Ayres] skewers American greed, L.A. life, and his own endless romantic foibles...Somehow, Ayres knew the fall was coming and kept going anyway. So did we." —*Time* "Were this merely a tale of a stranger in a strange land, Ayres's hilariously self-effacing manner would make this worth reading. But what makes it more than merely clever is the way Ayres turns his own romantic insecurity and material aspiration into a stinging, if sympathetic, indictment of mindless consumption. Yes, we're destroying the planet, he seems to say, but can we help it, given how pathetic we are? And anyone who can make us laugh at that must be a genius." —*Booklist* (starred review)
