Electronic Media Jun 19 2021 Electronic Media: Then, Now, and Later provides a synopsis of the beginnings of electronic media in broadcasting and the subsequent advancements into digital media. The Then, Now, and Later approach focuses on how past innovations laid the groundwork for changing trends in technology, providing the opportunity and demand for evolution in both broadcasting and digital media. An updated companion website provides links to additional resources, chapter summaries, study guides and practice quizzes, instructor materials, and more. This new edition features two new chapters: one on social media, and one on choosing your entertainment and information experience. The then/now/later thematic structure of the book helps instructors draw parallels (and contrasts) between media history and current events, which helps get students more engaged with the material. The book is known for its clear, concise, readable, and engaging writing style, which students and instructors alike appreciate. The companion website is updated and offers materials for instructors (an IM, PowerPoint slides, and test bank)

Log Home Living Jun 07 2020 Log Home Living is the oldest, largest and most widely distributed and read publication reaching log home enthusiasts. For 21 years Log Home Living has presented the log home lifestyle through striking editorial, photographic features and informative resources. For more than two decades Log Home Living has offered so much more than a magazine through additional resources—shows, seminars, mail-order bookstore, Web site, and membership organization. That's why the most serious log home buyers choose Log Home Living.

The State of Play Jun 27 2019 *The State of Play presents an essential first step in understanding how new digital worlds will change the future of our universe. Millions of people around the world inhabit virtual worlds: multiplayer online games where characters live, love, buy, trade, cheat, steal, and have every possible kind of adventure. Far more complicated and sophisticated than early video games, people now spend countless hours in virtual universes like Second Life and Star Wars Galaxies not to shoot space invaders but to create new identities, fall in love, build cities, make rules, and break them. As digital worlds become increasingly powerful and lifelike, people will employ them for countless real-world purposes, including commerce, education, medicine, law enforcement, and military training. Inevitably, real-world law will regulate them. But should virtual worlds be fully integrated into our real-world legal system or should they be treated as separate jurisdictions with their own forms of dispute resolution? What rules should govern virtual communities? Should the law step in to protect property rights when virtual items are destroyed or stolen? These questions, and many more, are considered in The State of Play, where legal experts, game designers, and policymakers explore the boundaries of free speech, intellectual property, and creativity in virtual worlds. The essays explore both the emergence of law in multiplayer online games and how we can use virtual worlds to study real-world social interactions and test real-world laws. Contributors include: Jack M. Balkin, Richard A. Bartle, Yochai Benkler, Caroline Bradley, Edward Castronova, Susan P. Crawford, Julian Dibbell, A. Michael Froomkin, James Grimmelmann, David R. Johnson, Dan Hunter, Raph Koster, F. Gregory Lastowka, Beth Simone Noveck, Cory Ondrejka, Tracy Spaight, and Tal Zarsky.*
