**An Uncertain Glory Sep 30 2019** From two of India's leading economists, Jean Drèze (Hunger and Public Action) and Nobel Prize-winner Amartya Sen (The Idea of Justice), *An Uncertain Glory* is a passionate, considered argument for the need for a greater understanding of inequalities in India, despite economic development. When India regained independence from colonial rule in 1947, it immediately adopted a firmly democratic political system, with multiple parties, freedom of speech and extensive political rights. The famines of the British era disappeared, and steady economic growth replaced stagnation, accelerating further over the last three decades to make India's growth the second fastest among large economies. Despite a recent dip, it is still one of the highest in the world. Maintaining rapid yet environmentally sustainable growth remains an important and achievable goal for India. Drèze and Sen argue that the country's main problems lie in the disregarding of the essential needs of the people. There have been major failures both to foster participatory growth and to make good use of the public resources generated by economic growth to enhance people's living conditions; social and physical services remain inadequate, from schooling and medical care to safe water, electricity, and sanitation. In the long run, even high economic growth is threatened by the underdevelopment of infrastructure and the neglect of human capabilities, in contrast with the holistic approach pioneered by Japan, South Korea and China. In a democracy, addressing these failures requires not only significant policy change, but also a clearer public understanding of the abysmal extent of deprivation in the country. Yet public discussion in India tends to be constricted to the lives and concerns of the relatively affluent. This book presents a powerful analysis not only of India's deprivations and inequalities, but also of the restraints on addressing

them - and of the possibility of change through democratic practice.

*The Process of Social Research* Oct 31 2019 The Process of Social Research successfully meets two major challenges of teaching social science methods: to make the material interesting and accessible to students, and to provide them with the tools necessary to understand, evaluate, and conduct research. Authors Jeffrey C. Dixon, Royce A. Singleton, Jr., and Bruce C. Straits employ a conversational writing style that is engaging and student-friendly. Using everyday examples to introduce chapters and clarify complex concepts, they provide current research examples on such cutting-edge topics as immigration, family composition, prosecutorial misconduct, organized racism, homelessness, social inequality and education, and alcohol consumption and grades. Placing a unique emphasis on the research process, the book helps students understand the logic and mechanics of social research, giving them the tools and the power to evaluate the research of others and to conduct their own research. Beginning with the introduction, every chapter contains flowcharts of research processes. As each diagram is presented, the authors relate the specific method to the overall research process. Then, over the course of the chapter or section, they flesh out each step. This way, they convey information about the "nuts and bolts" of research while ensuring that students do not lose sight of the logic of inquiry. Comprehensive and up-to-date without attempting to be encyclopedic in its coverage, *The Process of Social Research* provides a balance between qualitative and quantitative research, taking a more integrated approach to describing the relationship between theory and research.

Culture at the Crossroads Jan 15 2021 This collection explores the interfaces of culture, gender, and power from politico-religious, linguistic, legal and historiographic perspectives. More

importantly, the contributions gathered here examine culture's manifestations in different socio-economic, political, theoretical, and discursive contexts. Being aware of "the crisis in humanities," researchers, scholars and experts seek to relocate culture and cultural studies within academia and analyze the epistemological relationship between culture and education, while also trying to eschew and refashion the stale conventional methodologies of approaching culture as an academic subject. Is it possible to go beyond the "crisis in humanities" by valorizing culture in social and human sciences, on the one hand, and natural and exact sciences, on the other, especially when we take into consideration the escalation of fundamentalist, extremist and xenophobic tendencies all over the globe? How can we approach the issues of ethics and teaching humanities and sciences? This book moves beyond conventional conceptions of culture that associate it with knowledge and enlightenment to suggest a holistic view of culture that enacts the dialectics of power, nationality, class, gender, and ethnicity in an ever-shifting transnational context. Engaging readers in a lively intellectual and cultural debate, this volume is essential reading for undergraduate and graduate students, teachers, critics, and scholars from various academic fields and disciplines, including historiography, cultural studies, anthropology, political science, literature and critical theory.

**How People Learn** Aug 29 2019 First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

**Glimpses of World History** Sep 10 2020 A Simple Account of the World History 'Glimpses of the World History' is an account of the progress of the world through centuries and ages. This book is a collection of letters that Jawaharlal Nehru wrote to his daughter Indira when he was in various Indian prisons for three years. The letters were meant to introduce her to the world and its history. In the first few letters, Nehru expresses his sadness for not being able to be around his daughter and give her the materialistic gifts that other parents could but he promises to give her a gift that he could afford; in the form of knowledge and wisdom through words that come from the very core of his heart. Nehru wrote 196 letters and covered the history of mankind from 6000 BC to the time he was writing the letters. Tales of Empires A major part of these letters talks extensively about the rise and fall of empires around the world and development of civilizations as well. Nehru talks about the histories of every significant place ranging from Greece in the far West to China in the east. The book talks about the wars that were fought during these years and the greatest revolutions that overthrew established dynasties. Nehru has also written about the legendary leaders and kings who have walked the earth including right from Alexander the Great to Mahatma Gandhi. A Different View Unlike many other books that talk more or less about particular history of specific cultures, this book is a panoramic view of the history of mankind. It talks about the barbarians as well as the well behaved societies in the far west. Nehru has written this book with lot of wit which makes it an interesting read.
