[Gaining from Trade in Southern Africa](#) May 19 2021 Policy-makers in Southern Africa are increasingly convinced that regional trade liberalization can improve growth performance and stimulate development throughout the region. To succeed where previous attempts have failed, however, governments must address two key issues. The first of these is policy coordination - the broad range of domestic policies must be made compatible with the proposed trade reforms. The second is institution building - concerted attention must be devoted to strengthening weak institutions and infrastructure. The contributors are among the leading authorities on regional integration in Africa.

Crime, Law and Justice in New Zealand Apr 17 2021 Crime, Law and Justice in New Zealand examines the recent crime trends and the social, political, and legal changes in New Zealand from the end of the twentieth century to the present. Serving as the only New Zealand-specific criminal justice text, this book takes a direct look at what is unique about the country's criminal justice system and recent crime trends. Crime rates peaked in the early 1990s and have fallen since. Newbold considers why this happened through factors such as economy, ethnic composition, changing cultural trends, and legislative developments in policing and criminal justice. He unpacks various types of crime separately—violent crime, property crime, drug crime, gang crime, organised crime, etc.—and examines each in terms of the various complex factors affecting it, using illustrative examples from recent high-profile cases. The cover photo for Crime, Law and Justice in New Zealand was taken by Jono Rotman.

Critical Decisions at a Critical Age Apr 29 2022 This book uses micro-level data for 18 Latin American countries to examine the choices adolescents make in three areas of behavior: their time allocation toward school and work, their sexual behavior and fertility, and their adoption of adult roles as they marry or cohabitate. Analyzing these issues comparatively across countries provides a richer contrast of the broad range of behavior among youth around the region than traditional country studies. The analysis pays particular attention to the accumulation of human capital, a key determinant of living standards at the individual level and social progress at the aggregate level.

Gold Coins of the World - 9th edition Dec 26 2021 A unique and indispensable reference work Unsurpassed in content and scope When the first edition of Gold Coins of the World made its debut in 1958, it forever changed the way gold coins were collected, cataloged, traded, and priced. For the first time, one book provided a reliable guide for a subject which previously required an often expensive investment in multiple volumes of literature, some of it rare and antique, and much of it badly out-of-date. With the publication of this pioneering work, Robert Friedberg (1912-1963) established himself as an international icon in the field of numismatic literature. This book, and the 'Friedberg Numbering System' he developed became then, and is still today, the internationally-recognized standard for systematically identifying any gold coin ever made. From just 384 pages in 1958, Gold Coins of the World has expanded to the extent that it now contains more than triple the information of its ancestor. It still stands alone as the first and only book to describe, catalog and price two millennia of gold, platinum, and palladium coin issues from across the globe. From the first coins of the ancient Greeks to the most recently-issued modern commemoratives, they are all here, an astonishing compilation of more than 21,000 individual coin listings accompanied by over 8,000 actual-size photographs. The prices have been completely updated, for the most part raised substantially, to reflect the current market. Entire sections have been expanded, many illustrations have been added or improved, and hundreds of new discoveries and recent issues have been included for the first time. Arthur Friedberg, president of the International Association of Professional Numismatists from 2001 to 2007 and now its Honorary President, and Ira Friedberg, have completely revised and expanded their late father's work. They have had the valuable assistance and cooperation of a who's who of the leading numismatists on every continent in bringing this edition to fruition. For the numismatist, banker, economist, historian, institution of higher learning, or a fancier of the noble metal in all its forms, Gold Coins of the World is a book for every library, public and private.

Domenico Bianchi and Mario Merz Jan 03 2020 This catalogue features the work of artist Domenico Bianchi and an homage to the belated Mario Merz, specifically created for the exhibition in the city of Bari. A series of images reproduces the most important experiences by Bianchi (in indoor space), and Merz (in outdoor locations). Merz's work consists of a large igloo that stands on a silver painted cervo in the middle of the Renaissance Courtyard of the Castello Svevo. Inside the castle, along a 20-meter-long wall is a cross-shaped display of eleven paintings made by Bianchi out of wood, white gold, wax, and fiberglass as a tribute to and spiritual view of Merz's life and work.
